Dear Hiring Manager,

I am writing to apply for the Junior Full Stack Developer position. I am currently a fourth-year Business Information Technology student at ACLEDA University of Business, with a strong interest in full-stack web development, database management, and software development.

I have hands-on experience with HTML, CSS, JavaScript, React.js, Tailwind CSS, PHP/Laravel, ASP.NET Core MVC, MySQL, PostgreSQL, SQL Server, RESTful APIs, Git, GitHub, Docker, and Postman. I also completed a Software Developer Internship at ACLEDA University of Business, where I gained practical experience developing responsive, database-driven web applications, working with JavaScript and jQuery, integrating Microsoft SQL Server, using Git and GitHub for version control, debugging applications, and collaborating with team members.

In addition, I have worked on projects such as a School Management System, Library Management System, and E-commerce Website. Through these projects, I gained experience in frontend and backend development, database integration, authentication, CRUD operations, Google OAuth, and Telegram OTP.

I am motivated, responsible, willing to learn, and eager to develop my skills in a professional environment. I believe my technical foundation, internship experience, and willingness to learn would allow me to contribute positively to your development team.

Please find my CV attached for your review. I would appreciate the opportunity to discuss my qualifications and experience further in an interview.

Thank you for your time and consideration.

Sincerely,

Chun Rattanakvisal
